

OTR TPMS + SOLUTIONS

Tire Performance Management Solutions

“ We tested a number of TPMS products before outfitting our fleet with PressurePro. We now run them 24 hours a day, 365 days a year in the harshest of environments. They’ve outperformed our expectations proving to be tough, dependable & lasting in our difficult underground mines. We have seen a significant decrease in the amount of tires damaged or destroyed and PressurePro takes away the guess work for maintaining tire pressures correctly, easily and accurately. ”
Dennis Keene, The Doe Run Co.

From loaders and scrapers, to movers, cranes and more, PressurePro brings you the market’s most tested and proven TPMS solutions, arming you with the tools and information needed to add savings, safety and efficiency to your operations. **Maintaining proper tire pressure is critical. Don’t get caught flat.**
